

Highlights at 2013 PCI CONVENTION!

We were pleased to have a big audience and good responses at our booth during 2013 PCI Convention and National Bridge Conference in Dallas, Texas, last month. It was good seeing all of our existing customers and the new ones we hope. We enjoyed hearing the stories of your projects using our NMB Splice Sleeve and really appreciate the feedback. For those of you who missed PCI or our booth, following are the highlights of the featured products and its applications at the 2013 exhibit:

- **Slim-Sleeve®** for Horizontal Sliding Connection (beam-beam, column-spandrel, and deck panels)
- **High Strength Sleeve** for Grade 75, 80, & 100 rebars
- **High Strength Grout SSM 120N** of more than 17,400 psi
- **Mass-Grouting Method** for time, labor, and cost efficiency
- **NXII Splice-Sleeve®** – “Slimmer/Shorter” and “compact” design and best cost performance

Many thanks for your continued interest in our products and its applications
